

JONRICH BASCUG

Web Application Developer — UX, Automation & Enterprise Systems

Valenzuela City, Philippines • jbbascug20@gmail.com • 0908 668 3254 • [linkedin.com/in/ionrich-bascug](https://www.linkedin.com/in/ionrich-bascug) • portfolio-by-jonrets.netlify.app

SUMMARY

Web application developer with a product and UX mindset. Experienced designing, building, securing, and improving internal enterprise systems across HR, operations, clinic, customer complaints, events, payroll, and admin — from workflow analysis and information architecture to automation, data-driven interfaces, AI-assisted analysis, and application security.

CORE SKILLS

PRODUCT & SYSTEMS

Workflow analysis, information architecture, process mapping, requirements discovery, internal tools, edge-case handling, failure-state design, RBAC, operational improvement

SECURITY & RELIABILITY

MFA (Email OTP + Authenticator), RBAC, Spatie audit logging, password policy & expiry, brute-force protection, auto-lock, OWASP, npm audit

AUTOMATION & DATA

Workflow automation, operational dashboards, data analysis interfaces, AI-assisted data analysis

APPLICATION DEVELOPMENT

Laravel, PHP, MySQL, REST APIs, JavaScript, jQuery, AJAX, Blade, HTML5, CSS3, Bootstrap, AdminLTE

DESIGN & UX

UI/UX design, user flows, forms, tables, data-entry UX, dashboards, admin interfaces, security-sensitive UX, Figma, Google Stitch

TOOLS & WORKFLOW

Git, GitHub, GitLab, Bitbucket, OpenCode, Claude Code, Codex, Freshservice

WORK EXPERIENCE

CDO FOODSPHERE, INC. — Valenzuela City, Philippines

Web Application Developer / Application Support Specialist • Dec 2024 – Present

Enterprise Systems & Workflow Automation

- Designed and shipped an event-driven check-in system across two plant sites for 4 company-wide events a year (700–5,000+ attendees), cutting per-person check-in from 1–2 minutes of manual name and detail writing to a 2–3 second scan.
- Mapped clinic intake and records workflows and built a clinic management system used by nurses and doctors to manage 2,000–5,000 patient records per quarter; replaced paper intake and cut HRIS patient lookup from ~10s to ~2s by loading data once and filtering client-side.
- Built a CMS-style event and raffle system that lets non-technical staff create and customize registration and raffle pages themselves, removing the recurring developer ticket for every template change.

Product, Data & AI

- Maintained and enhanced the Customer Complaint Tracking System (CCTR), handling 100+ complaints per month for 20+ departments — added multi-dimensional filtering, KPI summaries, charts, and an AI-assisted interface that returns complaint summaries and trend answers in 3–7 seconds.
- Translated operational requirements into system workflows, interfaces, data structures, and implementation decisions across multiple internal applications.

Security & Application Reliability

- Led a security hardening program across five internal systems after an incident — remediated 100+ vulnerabilities and rolled out MFA, audit logging, password expiry, and 3-attempt auto-lock in ~1 month (2–3 months including post-deployment fixes and documentation).
- Designed security-sensitive auth and admin interfaces — audit trails, MFA settings, active-user management — applying RBAC, OWASP practices, and npm audit while balancing information hierarchy and usability for enterprise users.

Technical Delivery & Product Execution

- Led technical delivery for IT Week (Tech'ka Muna!), a company-wide event with 500+ attendees — designed and shipped three original interactive web systems to production in one month. Built a Smart TV-synced photo pipeline that generated 200+ AI photobooth photos, plus a 6×6 memory game that ranked #1 for engagement with 500+ unique players and 1,000+ sessions.
- Worked independently across discovery, workflow analysis, interface design, implementation, debugging, and production support while coordinating with operational stakeholders.

EDUCATION

OUR LADY OF FATIMA UNIVERSITY — B.S. Computer Science

Jan 2020 – Aug 2024

ADDITIONAL

Certifications: CompTIA ITF+ (Aug 2024)
