

JONRICH BASCUG

Web Application Developer — UX, Automation & Enterprise Systems

Valenzuela City, Philippines · jbbascug20@gmail.com · 0908 668 3254 · linkedin.com/in/jonrich-bascug · portfolio-by-jonrets.netlify.app

SUMMARY

Web application developer with a product and UX mindset. Experienced designing, building, securing, and improving internal enterprise systems across HR, operations, clinic, customer complaints, events, payroll, and admin — from workflow analysis and information architecture to automation, data-driven interfaces, AI-assisted analysis, and application security.

CORE SKILLS

PRODUCT & SYSTEMS

Workflow analysis, information architecture, process mapping, requirements discovery, internal tools, edge-case handling, failure-state design, RBAC, operational improvement

APPLICATION DEVELOPMENT

Laravel, PHP, MySQL, REST APIs, JavaScript, jQuery, AJAX, Blade, HTML5, CSS3, Bootstrap, AdminLTE

SECURITY & RELIABILITY

MFA (Email OTP + Authenticator), RBAC, Spatie audit logging, password policy & expiry, brute-force protection, auto-lock, OWASP, npm audit

DESIGN & UX

UI/UX design, user flows, forms, tables, data-entry UX, dashboards, admin interfaces, security-sensitive UX, Figma, Google Stitch

AUTOMATION & DATA

Workflow automation, operational dashboards, data analysis interfaces, AI-assisted data analysis

TOOLS & WORKFLOW

Git, GitHub, GitLab, Bitbucket, OpenCode, Claude Code, Codex, Freshservice

WORK EXPERIENCE

CDO FOODSPHERE, INC. — Valenzuela City, Philippines

Web Application Developer / Application Support Specialist · Dec 2024 – Present

ENTERPRISE SYSTEMS & WORKFLOW AUTOMATION

- Designed and shipped an event-driven check-in system for company-wide events across two plant sites — mapped in/out workflow, implemented timestamped eligibility, session handling, and live participant monitoring to replace manual ticket preparation.
- Mapped clinic intake and records workflows and developed a clinic management system that reduced manual data entry and improved data accuracy for staff and administrators.
- Built a CMS-style event and raffle workflow that lets non-technical staff customize registration and raffle pages without developer involvement.

PRODUCT, DATA & AI

- Maintained and enhanced the Customer Complaint Tracking System (CCTR) — added multi-dimensional filtering, KPI summaries, analysis charts, and an AI-assisted interface for summarizing complaints, surfacing trends, and answering natural-language questions.
- Translated operational requirements into system workflows, interfaces, data structures, and implementation decisions across multiple internal applications.

SECURITY & APPLICATION RELIABILITY

- Led application hardening across five internal systems following a security incident — remediated 100+ vulnerabilities and implemented MFA, audit logging, password expiry, and auto-lock after three failed attempts.

- Designed security-sensitive auth and admin interfaces — audit trails, MFA settings, active-user management — applying RBAC, OWASP practices, and npm audit while balancing information hierarchy and usability for enterprise users.
-

TECHNICAL DELIVERY & PRODUCT EXECUTION

- Led delivery for IT Week (Tech'ka Muna!), a company-wide technology event with 500+ attendees — designed and shipped three interactive web systems under deadline: Smart TV-synced image carousel, anti-cheat “AI vs Real” detection quiz, and 6×6 memory game with live leaderboard.
- Worked independently across discovery, workflow analysis, interface design, implementation, debugging, and production support while coordinating with operational stakeholders.

EDUCATION

OUR LADY OF FATIMA UNIVERSITY — B.S. Computer Science

Jan 2020 – Aug 2024

ADDITIONAL

Certifications: CompTIA ITF+ (Aug 2024)
